To whom it may concern

I have been closely involved as a client project representative and/or as the representative of the Lessor of the land on several projects that Vos Construction have been the building contractor, both at the Huon wood centre site and at the Smithton wood centre. The projects have included construction of a sawmill building for Neville Smith Timber, rotary peel veneer building at Huon wood centre for Ta Ann Tasmania, a larger rotary peel veneer building for Ta Ann Tasmania at Smithton and the extension of the building at Smithton for installation of a new plywood line. These projects have occurred over ten years of association with the company.

All of the projects are of a design and construct nature.

Vos Construction brought good design process management skills to each assignment and were at all times accommodating of client needs and showed they were very client focused..

Project delivery was often done over a winter period and Vos were very effective at organising work that kept the project moving despite of at time adverse weather conditions.

In the projects that I have directly had a role in the construction phase as Principal's Representative, the financial management of the project has been transparent and equitable throughout. The diligence of Vos to site management and OHSE matters was of a very commendable order.

In each instance, the Vos Construction team that I have worked with have been responsive and worked collaboratively to deliver the client needs in the most cost effective manner possible.

I would have no hesitation in working with Vos Construction on any future project and am pleased to provide this recommendation to any prospective client.

Should you wish to discuss this in more detail please do not hesitate to contact me on 0412 291 450.

Yours sincerely,

**Dario Tomat**
